

**City Directories
in the collection of
The Morris County Library**

City directories are very useful reference sources for many researchers. Although they can vary as to the features they contain, usually they include an alphabetical directory of private citizens and business concerns in a particular geographical area, a classified list of businesses, a list of householders and occupants of business places, a street guide, and a reverse telephone number listing. Sometimes there is also a listing of local officials and government offices.

This guide lists the directories in the Morris County Library. The books are in the New Jersey Reference section; the microfiche and microfilm are housed in the microform cabinets also in New Jersey Reference. The microfiche is in Drawer #10 and the microfilm in Drawer #18. Jersey City, Newark, and Paterson each have two sets of microfilm covering different time periods; these I have designated Newark I and Newark II, etc.

After you search a particular town, it is helpful to also search the county where the town is located for possible further listings. Reference librarians are always available to help you locate and use these materials.
